ABSTRACTED-PUB-N0: WO 0211717 A1
BASIC-ABSTRACT:

NOVELTY - Skin care composition comprises an antioxidant and carnitine in specified amount.

DESCRIPTION - A skin care composition in the form of a cream or lotion comprises a cosmetically acceptable vehicle, an antioxidant (1-30%), carnitine (1-30%) and optionally coenzyme Q (0.01-10%) and/or creatine (1-30%). The cream or lotion delivers 40 mg/day of an antioxidant, 50 mg/day of a carnitine and optionally 10 mg/day of coenzyme Q and/or 0.5 grams/day of creatine.

INDEPENDENT CLAIMS are included for:

(1) a cosmetic method of treating aged, photoaged, dry, lined or wrinkled skin and improving the mitochondrial function in the skin involves applying a cosmetic skin care composition to the skin comprising antioxidant (0.01-30%), carnitine (0.01-30%), optionally coenzyme Q (0.001-10%) and/or creatine (0.1-40%) and cosmetically acceptable vehicle; and

(2) a method of protecting skin from the deleterious effects of sun exposure involves applying a sunscreen composition comprising antioxidant (0.001-10%), carnitine (0.001-10%), optionally coenzyme Q (0.001-10%) and/or creatine (0.1-40%).

None given.

USE - For treating aged, photoaged, dry, lined and wrinkled skin; for improving the mitochondrial function in the skin; for protecting skin from the deleterious effects of sun exposure (all claimed). The cosmetic composition can also added to hair tonic, lotion, cream, shampoo, conditioner, cleansers, normalizers, surface moisturizers, serums, anti-wrinkle creams, long-lasting lipsticks, lip-glosses, face masks, bath salts; also useful in a wide variety of new beauty products such as facial, neck and hand patches; professional and home facial kits; chemical peels or post-peel gels and creams; products to lighten age spots and sunspots; products to minimize scars; products to use after laser treatment; moisturizing gloves and socks; anti-small vein lotion; medicated creams, paraffin soaks, shave creams for men and women; depilatory products; anti-razor rash products; hair- and scalp-rejuvenating formulas.

ADVANTAGE - The composition slows the downward spiral that skin experience with age. It also protects skin against the impairments of aging and permits rejuvenated skin cells to restore youthful immune resistance and appearance. The combination can be used for both medical and cosmetic application.

ABSTRACTED-PUB-N0: WO 0211717 A1
EQUIVALENT-ABSTRACTS:

PHARMACEUTICALS

Preferred Components: The antioxidant is lipoic acid (preferably R-alpha-lipoic acid). The carnitine is acetyl-L-carnitine (ALC). The coenzyme Q is coenzyme Q10.

The administration is topical in the form of cream or lotion.

An oil-in-water emulsion cosmetic composition was prepared comprising (w/w.%): DI water (73.40), carbomer (0.30), disodium EDTA (0.10), glycerin (3), polysorbate 20 (2.50), butylene glycol (2), methylparaben (0.30), triethanolamine (0.30), isopropyl myristate (4), octyl palmitate (3), cetyl alcohol (1), carnitine (1), lipoic acid (1), creatine (0.90), dimethicone (0.50), beeswax (0.30), propylparaben (0.10), coenzyme Q10 (0.10), germall II (0.10), fragrance (0.10). The composition was suitable for improving the appearance and for application to healthy skin to prevent or retard deterioration.
